Pilot Navigator Engineer Operator Bombardier	15:45	16:15	About 20 minutes flight from target anti-aircraft shell passed through starboard engine nacelle, releasing the dinghy and puncturing the tyre. Aircraft began to vibrate and lose height. Bombs jettisoned and course set for base. On arrival, on advice from flying control, attempted to land on runway. Aircraft on touching down ran straight until the speed was lost and then turned to starboard and ran off runway. When aircraft struck soft ground it slewed around and nosed over, breaking both propellers and the plexiglass in the bombardier's position.
